

# Talk Together Speech Language Therapy & Social Skills Groups

## COVID-19 Protection Framework- The "Traffic Light System"

Talk Together is dedicated to providing accessible and inclusive services for children and their families. Students, families and staff health are a priority. Please see below details of how we will operate at the current traffic light level.

Talk Together fits under the definition of a close contact business.

### At ORANGE

- A Vaccine Passport needs to be sited for those over 12 years, 3 months of age to attend Talk Together services in person- speech language therapy sessions OR social skills group programmes. This includes students & others coming into the spaces where services are provided.
- Everyone (regardless of vaccination status) can access our services via tele-therapy online (speech language therapy sessions OR social skills group programmes).
- We will be continuing with our extra cleaning protocol for all resources.
- Mask use is encouraged at orange. We encourage masks to be worn by parents when 1m physical distancing can not be achieved. Especially around busy times (for example, group pick up and drop offs).

If you, or those who attend sessions, are not vaccinated and you are currently accessing face to face services at Talk Together please contact us for a chat and more information.

We look forward to seeing you soon!
